

## Lessons learned

- ✓ Smaller application for first testing is more suited.
- ✓ Early testing saves time and improves the quality of testing/ results obtained.
- ✓ Most of the time there are bugs in an application.
- ✓ Tools facilitate the process of testing, by enabling much easier and fitted testing.
- ✓ It is very important to know the “product” that it is being tested.
- ✓ One must all the time listen to superiors/mentor’s advice.
- ✓ Testing is very fun and challenging.
